

ECG Rhythms Flashcards

ECG interpretation is an art, a science and passion for some. There is no shortcut method for it. You can read and listen to basic lectures and learn only the basics. In reality, ECG do not behave typically. As a friend once said, they do not read books. Once you read more books and listen to other interpreters, you develop your own art of interpretation. This book is a collection of interesting ECG strips with wisdom shared and interpreted with interactions in this age of social media. Dual AV node conduction during sinus rhythm, atrial fibrillation with junctional tachycardia etc. are some interesting strips incorporated. The flashcard format hopes to make learning easy and brief.

Start studying ECG Rhythms. Learn vocabulary, terms, and more with flashcards, games, and other study tools. ECG Characteristics. Example. Normal Sinus Rhythm (NSR). Rate: 60-100 per minute. Rhythm: R-R = P waves: Upright, similar. P-R: 0.12 - 0.20 second. Normal Sinus Rhythm is the normal regular rhythm of the heart set by the natural pacemaker of the heart called the sinoatrial node.
