

When Ben Duncan chronicled his evolution from a Depression-era orphan in Alabama to an Oxford educated writer and commentator in England in 1962, he was unable to tell his whole story. He revealed much--a harrowing childhood, his tenacity and drive for self-definition and self-creation. But he also hid crucial parts of his life that would remain masked for fifty years. As a gay man living in Great Britain at a time when homosexuality was aggressively prosecuted in the courts, Duncan was forced to hide an essential feature of his life and identity. Now, in *The Same Language*, Duncan tells his story anew, weaving throughout his original memoir italic passages that reveal the true circumstances of his life--dire, humorous, and angry by turns--and honor the kinds of love, sexuality, and support that animated and defined his existence. Shifting from past to present and back again, Duncan tells of growing up in a string of foster homes, joining the military, earning a scholarship to Oxford, and negotiating the Kafkaesque bureaucracy of English immigration officials determined to keep him out. But here also is Duncan's account of his evolving sexuality, the many masks he was forced to contrive for survival and acceptance, and a vivid rendering of the underground world of gay life at every level of academia, politics, class, and social life in 50s and 60s-era Britain. An alien in his adopted country, an alien by nature of his sexual orientation, Duncan's story is a touching chronicle of one man's search for home--in a new country, with a man he loves, and within himself--a life no longer masked, but his own.

Principles of Clinical Chemistry, Inhibition of Folate Metabolism in Chemotherapy: The Origins and Uses of Co-Trimoxazole (Handbook of Experimental Pharmacology), Profiles of Drug Substances, Excipients and Related Methodology, Volume 38, Life of the Ancient Vikings (Peoples of the Ancient World), 101 Knock-Knock Jokes: Guaranteed to Make Even a Sourpuss Smile (Make Me Laugh!),
