

Emergency Procedures (Clinical Skillbuilders)

This portable reference shows airway insertion, endotracheal intubation, CPR, code management, blood transfusion, defibrillation, seizure management, and much more. For each procedure, nurses find indications and contraindications, step-by-step directions, potential complications, and instructions for documentation. Key steps are illustrated and include rationales. Trouble-shooting tips and special precautions are graphically highlighted. A self-test lets nurses measure what they've learned.
