

Warnings: The True Story of How Science Tamed the Weather

Warnings is a true story written in the style of a mystery novel. It tells the gripping story of how courageous scientists unravelled the mystery of violent storms. Fighting fear, bureaucracy, and Mother Nature, these scientists created today's storm warning system that saves so many lives. Warnings also describes the future natural disasters that continue to lurk and what we can do to prevent loss of life in the future. Author Mike Smith is an award-winning meteorologist and scientist who was one of the creators of the warning system and describes its history from a first-hand perspective. The hardcover edition has received superb interviews and there are additional photos and text in the eBook version. Anyone who has ever flown, has an interest in weather, or enjoys a great narrative non-fiction read will love Warnings.
